# Community Ride: Smarter, Simpler Transportation Assistance

Modernizing Mobility Programs for Seniors, Veterans, and People with Disabilities, NEMT, and Mobile Integrated Health.

Community Ride is an end-to-end digital platform that simplifies the creation, delivery, and oversight of on-demand transportation assistance programs. The cloud administration application for agencies and the mobile RideShare app for drivers and clients improve mobility, bridge service gaps, and ensure accountability while reducing administrative costs by 90%.

- **Easy:** Fast to implement and easy to use with little to no training for riders and drivers.
- **Secure:** Role-based access, HIPAA & PII compliant audit trails for accountability.
- **Flexible:** Client or agency-provided drivers.
- **Versatile:** Manage multiple funding sources, such as FTA, DOT, HHS, VA, CDBG, HUD, IDEA, and State and local, as well as private sources and self-pay.
- **Fraud-Resistant:** Using GPS tracking and secure codes.

For Agencies

- Manage programs, funding, clients, and payment rules
- Automate trip communication, and payments
- Gain real-time insights through dashboards and built-in compliance reporting
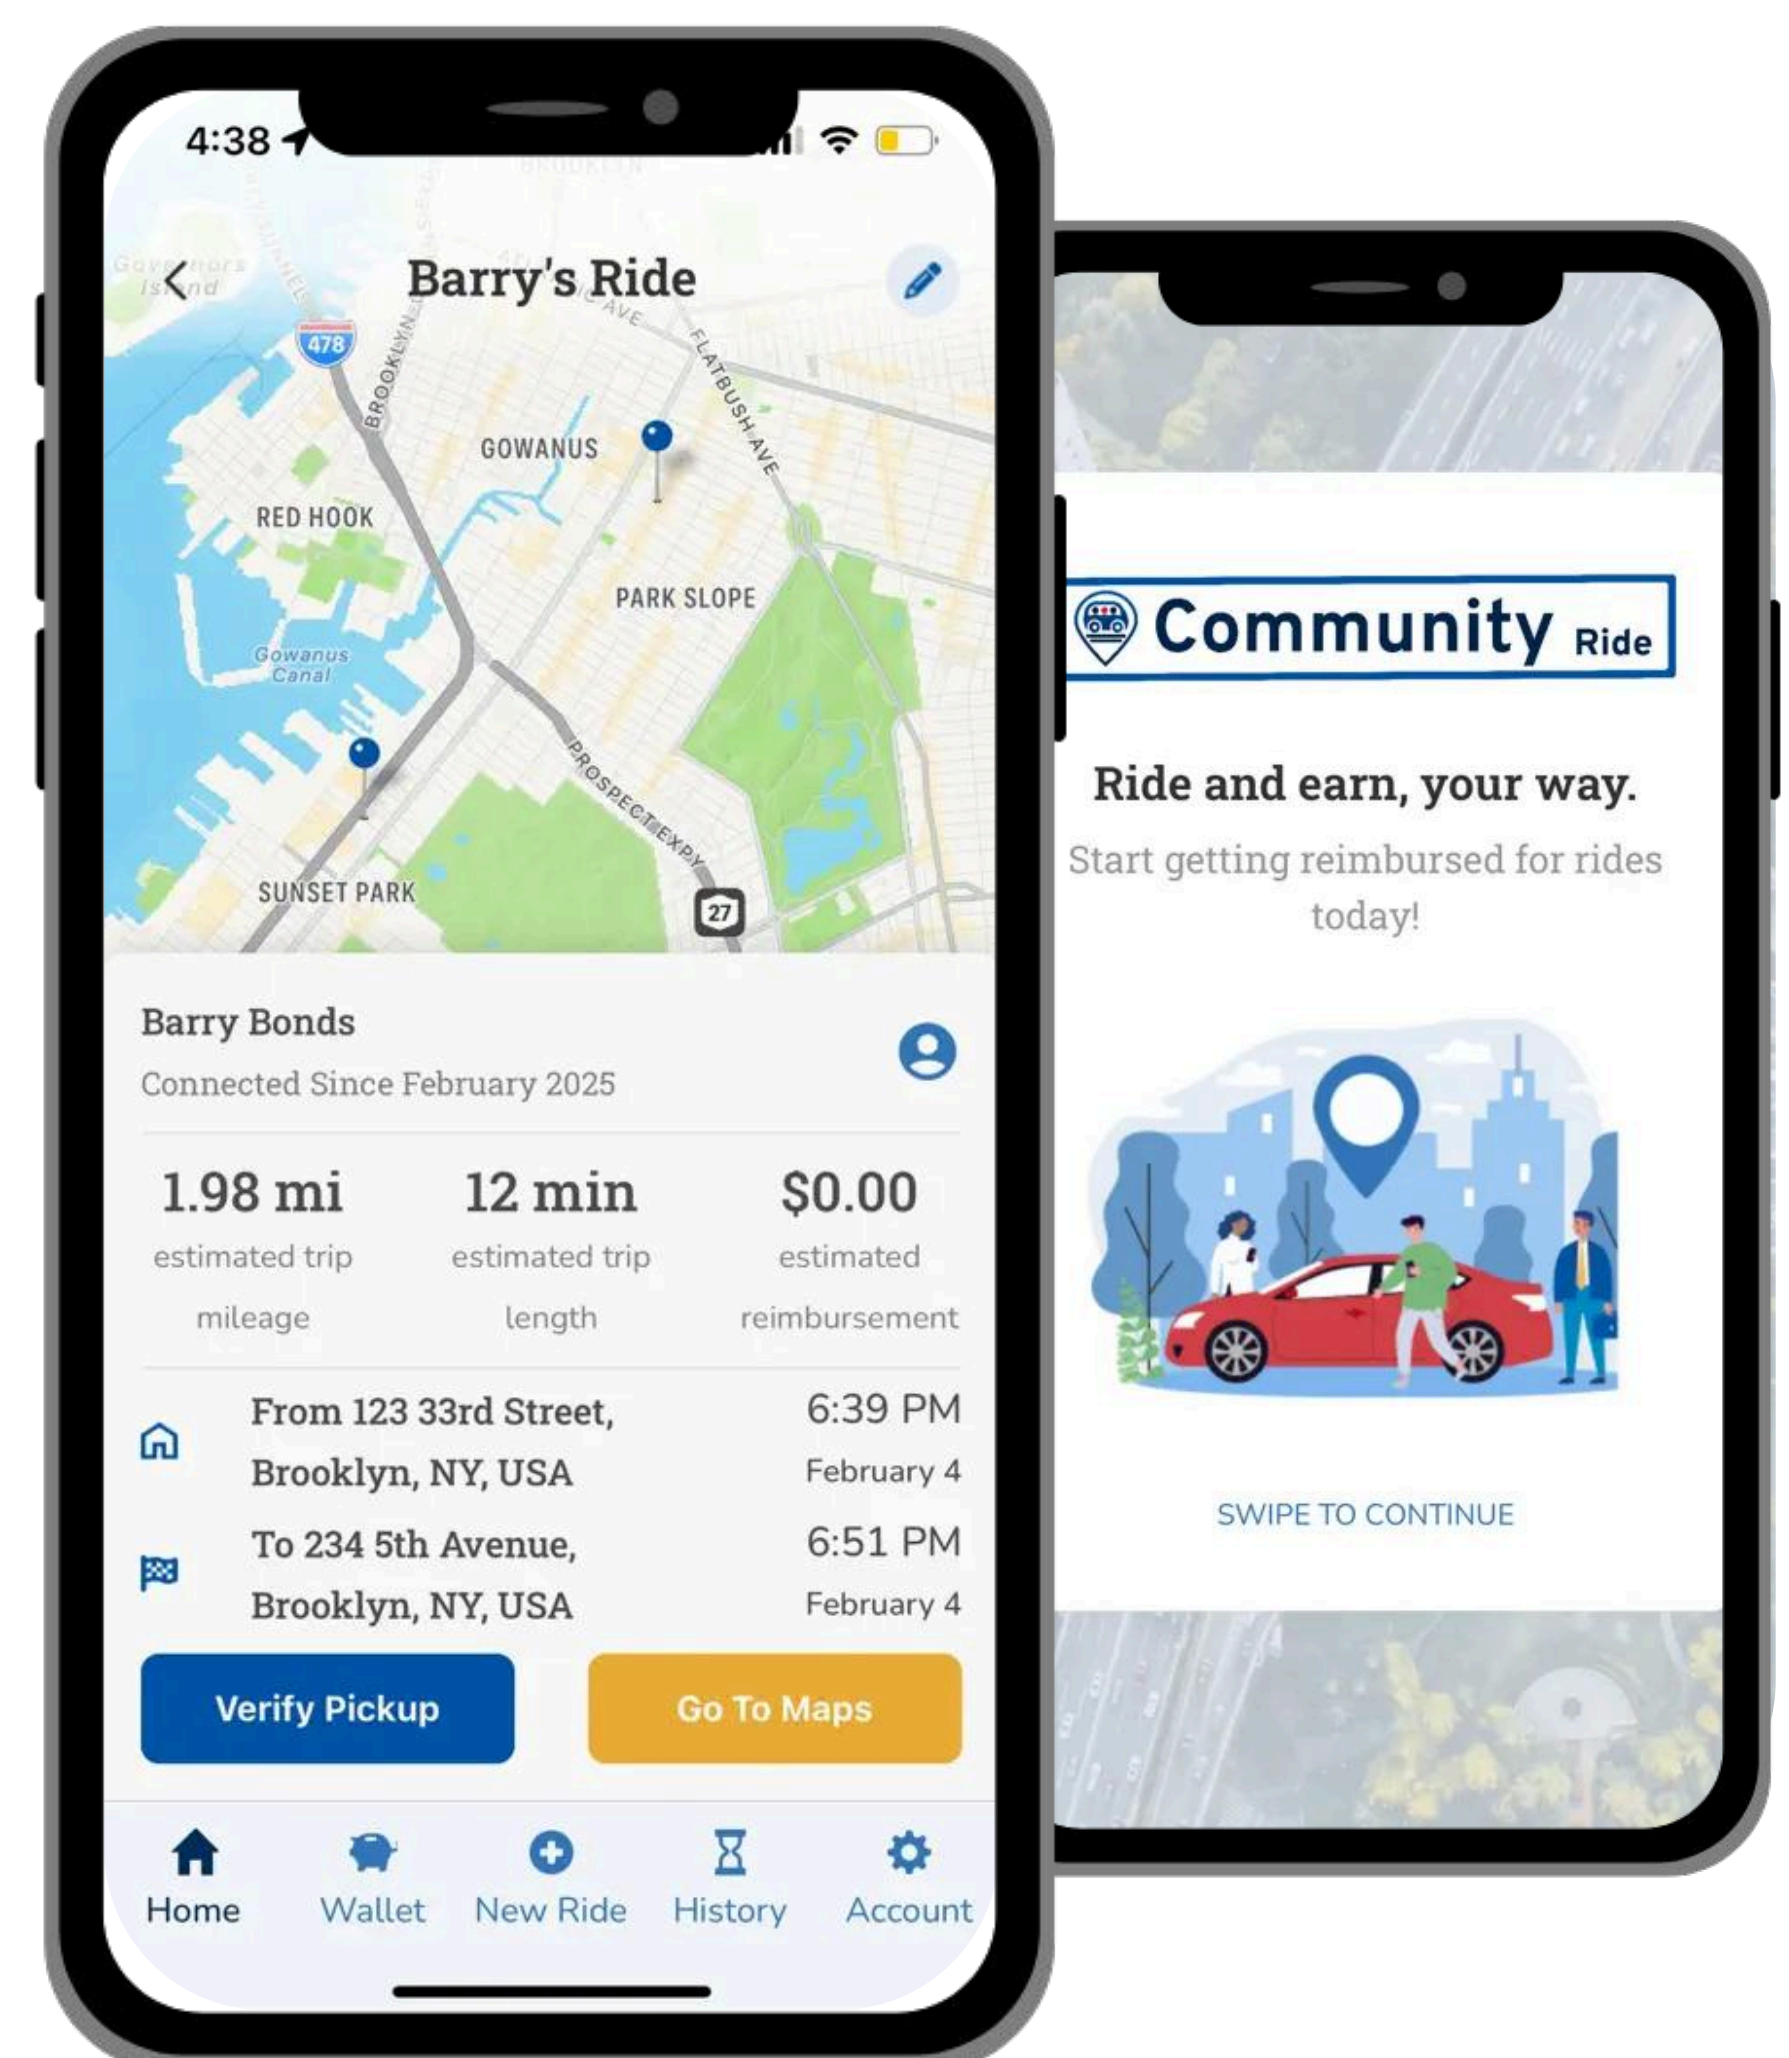

For Clients

- Schedule rides easily online or on mobile device
- Manage and monitor budget for rides
- Validate trips using GPS, secure trip codes, or signature

For Drivers

- Accept trips and confirm ride completion securely
- Upload and manage required credentials and availability
- Get paid promptly with automatic payment processing

Proven Innovation- Developed in partnership with Utah Transit Authority and CommHIT, Community Ride is already transforming mobility programs. The platform is fast to implement, easy to scale, and built for real-world public transit needs.
